PRODUCT DATA SHEET # 7003

ETSI RACK

- ❑ Conforms to standard ETSI Dimensions
- ❑ Removable side panels for improved access
- ❑ Versatile cable management facilities
- ❑ Aesthetically pleasing design
- ❑ Standard height of 2200mm
- ❑ Easily customised to individual requirements.

This new design ETSI Rack conforms to all of the standard ETSI dimensions, but incorporates some unique benefits over conventional designs.

The frame has no front corner posts which offers improved access for cabling. Cable entry can be from either top or bottom and vertical cable management is provided by the rear corner upright channels and by horizontal support brackets in each side.

The quick release, hinged side panels can either be opened or removed for cabling access.

The lockable glazed front door is fitted with quick release hinges and can be silk screened with your Logo if required.

An M12 earthing point is provided in the bottom of the rack and the external power socket can be supplied with a socket type of your choice.

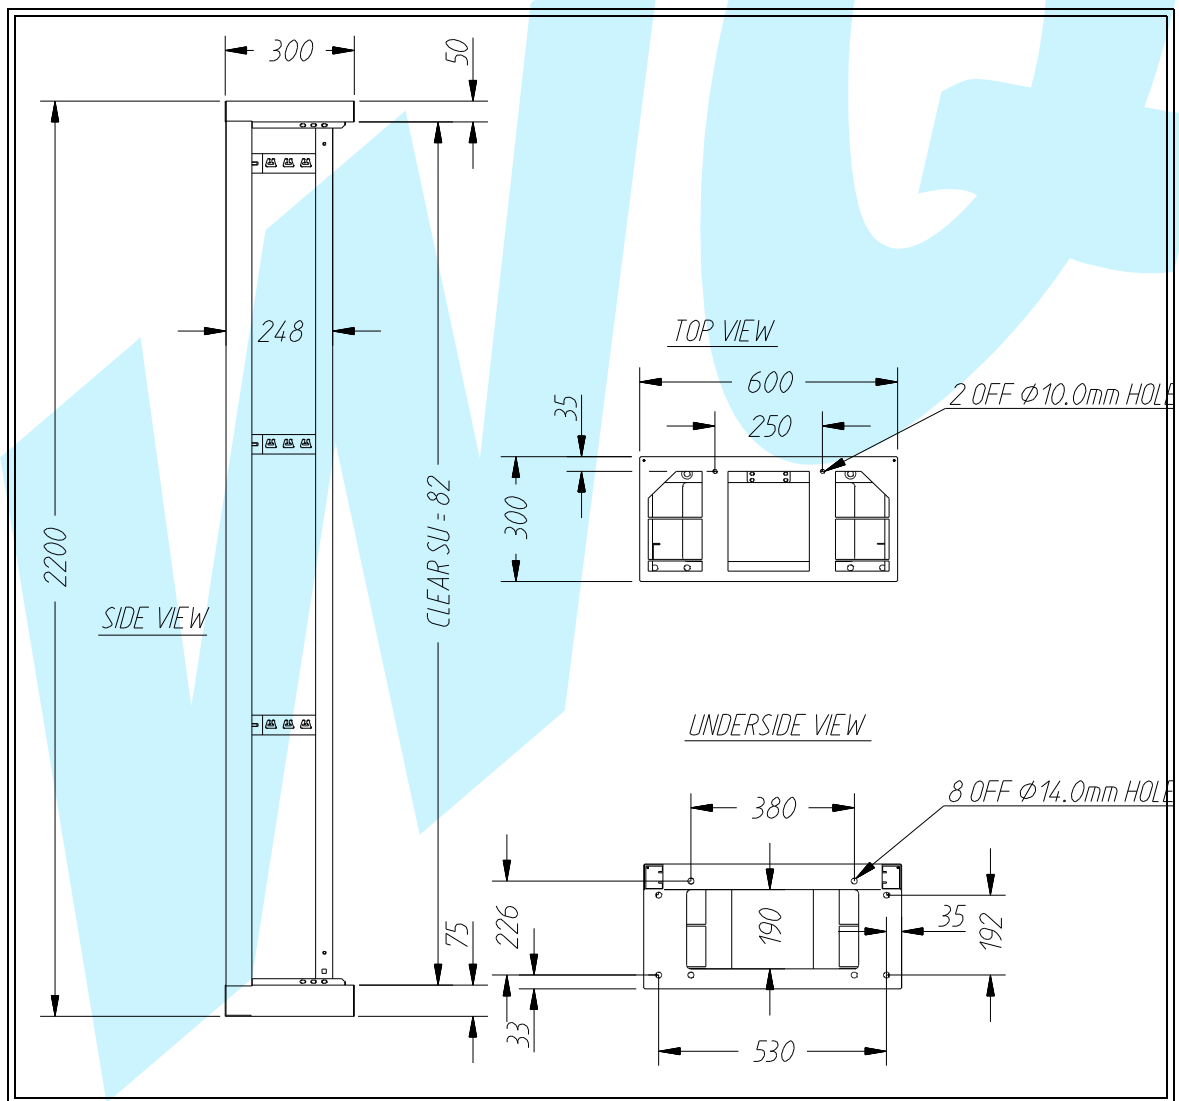

Racks can be bayed together side by side or back to back, and holes are included in the top and bottom for bolting down and securing to overhead support frames.

The racks are manufactured to order and so can be easily customised to suit individual requirements with regards to cable management, power distribution, colour etc.

The rack is offered in a standard height of 2200mm x 600mm wide x 300mm deep.

Finished as standard in Light grey Structured powder coat.

DIMENSIONAL DETAILS (doors & panels removed)
